GRANITE COBBLESTONE

It is currently the most stable and most practical method for coating the surface of the ground. The use of *granite blocks* solves the problem of drainage ounce and for all. It is also resistant to all weather conditions including harsh winters and cold frost. The rough texture of *granite blocks* make slipping a thing of the past. You can also use our **cobblestone** on your driveway.

OUTSIDE GRANITE STEPS

Stairs made of *granite and marble* are used outdoors because of the weather resistance as well as the practicality of use. The customer has the choice of product structure which affect its slip resistance. And so, in the case of *granite steps* we can make a rough surface, roasted, matt or polished.

OUR PRODUCTS MEETS EUROPEAN STANDARDS

GRANITE CURBINGS AND PALISADES

Granite curbs are the most durable product used in the construction of roads, bridges and other infrastructures. It is a material which has more strength and greater performance than concrete.

The use of this type of material insures your investment will remain intact for many years. it is extremely durable, even the coldest of winters and the heaviest of truck tire are not able to significantly damage the *granite*.

GRANITE ELEMENTS FOR GARDEN

Granite garden elements are applicable everywhere where nature is combined with infrastructure. It is a kind of a line separating one element from the other. It is also used on land in sidewalks, streets, garage driveways or garden slopes. Use a unique combination of *granite cubes* to line roads, sidewalks or driveways traffic is unwanted.
